

Matplotlib.pyplot Keywords

Name	Keyword / Syntax	Description
Import Matplotlib	<code>import matplotlib.pyplot as plt</code>	Imports the Matplotlib pyplot module.
Line Plot	<code>plt.plot()</code>	Draws a line graph.
Scatter Plot	<code>plt.scatter()</code>	Creates a scatter plot.
Bar Chart	<code>plt.bar()</code>	Creates a vertical bar chart.
Horizontal Bar	<code>plt.barh()</code>	Creates a horizontal bar chart.
Histogram	<code>plt.hist()</code>	Displays the distribution of data.
Pie Chart	<code>plt.pie()</code>	Creates a pie chart.
Box Plot	<code>plt.boxplot()</code>	Displays data distribution and outliers.
Title	<code>plt.title()</code>	Adds a title to the graph.
X Label	<code>plt.xlabel()</code>	Sets the label for the x-axis.
Y Label	<code>plt.ylabel()</code>	Sets the label for the y-axis.
Legend	<code>plt.legend()</code>	Displays the legend.
Grid	<code>plt.grid()</code>	Shows or hides the grid.
Figure Size	<code>plt.figure(figsize=(w,h))</code>	Sets the figure size.
Subplot	<code>plt.subplot()</code>	Creates multiple plots in one figure.
X Limits	<code>plt.xlim()</code>	Sets the x-axis limits.
Y Limits	<code>plt.ylim()</code>	Sets the y-axis limits.
Save Figure	<code>plt.savefig()</code>	Saves the graph as an image.
Show Plot	<code>plt.show()</code>	Displays the graph.
Close Figure	<code>plt.close()</code>	Closes the current figure.
