

Seaborn Keywords

Name	Keyword / Syntax	Description
Import Seaborn	<code>import seaborn as sns</code>	Imports the Seaborn library.
Load Dataset	<code>sns.load_dataset()</code>	Loads a built-in dataset.
Theme	<code>sns.set_theme()</code>	Sets the plot theme and style.
Line Plot	<code>sns.lineplot()</code>	Creates a line plot.
Scatter Plot	<code>sns.scatterplot()</code>	Creates a scatter plot.
Bar Plot	<code>sns.barplot()</code>	Creates a bar plot with statistical estimates.
Count Plot	<code>sns.countplot()</code>	Shows the count of observations.
Histogram	<code>sns.histplot()</code>	Displays data distribution.
KDE Plot	<code>sns.kdeplot()</code>	Displays a smooth density curve.
Distribution Plot	<code>sns.displot()</code>	Creates distribution plots.
Box Plot	<code>sns.boxplot()</code>	Displays quartiles and outliers.
Violin Plot	<code>sns.violinplot()</code>	Combines box plot and density plot.
Strip Plot	<code>sns.stripplot()</code>	Shows individual data points.
Swarm Plot	<code>sns.swarmplot()</code>	Displays non-overlapping data points.
Pair Plot	<code>sns.pairplot()</code>	Shows pairwise relationships between variables.
Joint Plot	<code>sns.jointplot()</code>	Displays the relationship between two variables.
Heatmap	<code>sns.heatmap()</code>	Visualizes data as a color matrix.
Regression Plot	<code>sns.regplot()</code>	Displays a regression line with scatter points.

Name	Keyword / Syntax	Description
Color Palette	<code>sns.color_palette()</code>	Selects colors for plots.
Despine	<code>sns.despine()</code>	Removes the top and right borders of plots.
